

PROJECT HEALTH CHECKS

WHAT ARE THEY?

Objective assessments of how well your initiative is performing to its objectives.

A health check is a:

- + Snapshot in time
- + Check of processes and standards for managing initiatives

A health check is not a:

- + Technical review
- + Audit
- + Gated assurance review

Outcomes of a health check:

- + Provides actions for
 - Accountable Officer to improve the likelihood of success
 - PMO to support capability maturity development (P3M3)

- + Takes about a week or two to complete
- + A reviewer will check documentation and interview people
- + The QGCIO endorses the AXELOS global best practice methodology health checks
- + There are health checks for projects, agile projects, programmes and portfolios

Get in touch with your PMO to organise a health check
